

Helping Individuals With Customized Virtual Tech Training

High Demand Skills To Get People Back To Work

CompTIA is responding to the **COVID-19 pandemic** by conducting live, virtual training to help unemployed and underemployed individuals upskill during this crisis.

As the global non-profit trade association, we prepare the workforce not just for what's now, but also for what's next. Now more than ever, jobs in IT are in demand as traditional jobs have been sidelined and the move to virtual environments has put a strain on IT departments across the globe. We're enhancing the IT workforce by providing on-ramps for individuals to receive industry-recognized IT training and certifications — **all in a virtual environment**.

CUSTOMIZED VIRTUAL TRAINING OFFERING

These customized, job-focused programs are inclusive of **wrap around services** with training, full learning content, certification exams, placement assistance and resume support.

Our virtual training is conducted by CompTIA instructors who each hold the certifications they teach and have several years of real-world IT experience. Instructors follow industry-standard IT training best practices to get results. Our **unique learning platform** allows two-way communication, giving the learner the opportunity to ask the instructor questions, participate in discussions, seek clarification and get trained.

Live virtual instruction from CompTIA ensures that **no travel is required**. This is critical given the current health crisis. However, it also saves time and expenses, as well as eliminates transportation issues. Learning may take place anywhere with an Internet connection.

ABOUT CompTIA

The Computing Technology Industry Association (CompTIA) is a leading voice and advocate for the \$5.2 trillion global information technology ecosystem; and the estimated 75 million industry and tech professionals who design, implement, manage and safeguard the technology that powers the world's economy. Through education, training, certifications, advocacy, philanthropy and market research, CompTIA is the hub for advancing the tech industry and its workforce.
