

National Lieutenant Governors Association

NLGA Partners Program

WHY NLGA?

The National Lieutenant Governors Association is the premier association for the nation's lieutenant governors and seconds-in-command of the states and territories. **NLGA brings together these leaders to discuss policy, share best practices, and build relationships** that will help improve the efficiency and effectiveness of state government.

LIEUTENANT GOVERNORS LEAD:

NLGA Members have a diverse array of important duties in state government, command public influence on legislation and policy, and they become Governor at a greater rate than any other official. About half of NLGA Members preside over their state's senate, and many oversee important departments and policy issues. **Every NLGA Member is their state or territory's gubernatorial successor – second in line to governor.**

PARTNER WITH NLGA AND BUILD RELATIONSHIPS:

The NLGA Partners Program is an opportunity for the private sector, nonprofits, associations, and other entities to share their expertise with NLGA and NLGA Members. Benefits include meeting registrations, opportunities for input on policy discussions, and the chance to build sustaining relationships with state government leaders and future governors.

NLGA Chairman Level Partnership is \$10,000 annually, billed on a rolling basis, based upon when the organization joins. Partnership includes the following benefits beginning August 2022:

- One complimentary registration to the 2022 NLGA New Elect & Business Meeting (November 30 – December 2, 2022) in New Orleans, Louisiana, *hosted by Louisiana Lt. Gov. Billy Nungesser*
- Two complimentary registrations to the 2023 NLGA Federal-State Relations Meeting (March 22-24, 2023) in Washington, D.C.

- Inclusion in the annual Partners Policy Guide, distributed to all NLGA Members in January ahead of legislative sessions

**NLGA benefits are subject to change. Effective January 1, 2024, Partner benefits will change, and Partner registrations to the NLGA spring meeting will be reduced to one.*
